Content (Written by Vari):

- Introduction, little bit about me and what I do (training methods)
- A little bit on my theory as to why dogs sometimes have behaviours outside the home that we don't like i.e. barking, pulling, aggressiveness
- Puppy training – Visiting the vet, teaching them to relax, toilet training (if needed), socialisation Q&A and helping anyone with anything in particular with puppy training – a lot of what I cover for puppies I also teach to adult dogs so good for everyone to listen in if they would like.
- Clicker training – a little on this for anyone who is interested
- Going back in time, doing behaviours with your dog to demonstrate that 'you' are in charge and 'you' are the guardian of everything. It's not their job to look after you.
- Everything on your terms – dogs like to train owners, I will talk through and show you how they have done this – we will all laugh and recognise what we have been trained to do.
- "leave it" training
- Giving your Samoyed a 'job to do' – they are a working breed and love to work!
- Playing games at home – hide in seek, go find
- Teaching a new trick – some ideas I have are; High five, spin/twirl, crawl, take a bow, speak and quiet 😊
