Secretary's Report

I would like to start my report with thanking everyone that helped with our Championship show.

With only a small committee and three of them not able to attend, it was much appreciated all the help given.

There are lots of people to thank and I hope I don't miss anyone. Lynne's mum, Ann Barr, for doing the flowers, Carole Horne and my mum for making food for the judge's lunch, Kevin Shugg, Judy Swetman, Bronwyn Weir and Scot Bray for helping to set-up on Sunday. Jo-Anne's sister Jane for making the lovely carrot cake and Paddy Watts for making and donating the Samoyed head embroidered towels for our Championship and Open show judges plus prizes for 'Best opposite of Sex'.

This year is the Clubs 60th Anniversary. We wanted to do something special for this Championship show

without blowing the budget.

Award Presentations designed a Special Diamond logo to be printed on the sashes.

Lorraine Fothergill did a great job of labelling all the prizes with the Diamond Anniversary.

Thank you to everyone that sponsored these prizes.

Petworkz and Bosch sponsored our Championship show. You might like to visit their web site: www.petworkz.co.nz See all the different foods, toys, dry beds, etc they have advertised. The Proplan food is cheaper than at Farmlands; it might be worth checking the price you pay for your commercial food?

The other interesting thing that I found on their web site is 'Muddy Mutts Rain Coat'. Unlike normal dog coats, this goes on like trousers, to keep the legs and belly clean and dry! It ties up over the body.

I find with the Samoyed having a good waterproof coat, it does not matter if they are outside in the rain.

When they come in, I dry their body with a clean dog towel and they look good, but it's their legs and belly that get all the dirty water splashed up on them.

Perpetual Trophies – at the moment I am organizing these. If you have any cups that are full – (they cannot be engraved or the engraver tells you this will be the last name fitted) can you please let me know?

OPEN SHOW

The show schedule is in this magazine. Anyone interested in Samoyeds is welcome to come and watch the show. We expect the show to start about 3.00pm on Saturday at Porirua.

We plan to hold our Annual Snow Dog Match in November. We still need to organize a date with the Alaskan Malamute and Siberian Husky clubs.

For more info on the above, you can contact me.

**Anita Shugg
Secretary**

Editorial

I was disappointed not to make it to the Championship show this year being bedridden with the flu - not the swine version thankfully. By all accounts the show went very well and my thanks to those who covered for me.

On pages 6 to 10 you will find the critique by our Australia judge, Vivienne Zavattaro, who was most prompt in providing this.

Congratulations to all the winners, and to the losers, better luck next time. You will have another opportunity to support the Club by entering our Open Show - see page 6 for the schedule.

Further to my comments in the last issue on the inadequacy of the NZKC web site I am delighted to note that the Executive Secretary has taken to heart my comments to NZKC Registrar Colleen Begg. The Annual Year Book for the year ending 31 December 2008 has been posted on the NZKC web site so

there is now no excuse for NZKC members to remain uninformed on the Club's financial status, breed statistics and so on. Nice one, Colleen.

Our breed moved up the rankings to 33rd for the 2008 year. This position was achieved through 15 litters and a total of 74 Samoyeds registered. The Labrador Retriever maintained its No. 1 ranking.

Total registrations (Part 1 register) dropped from 10,795 to 8,742.

Breed Standard

When did you last read the breed standard?

Last week, last month, last year, or more years than you care to remember?

Whether you are a breeder, exhibitor, or judge the breed standard is something that you should be fully conversant with, visualising in your mind the epitome of the breed.

In the Spring issue I will attempt to show the changes that have occurred to the standard and compare the current standards in other countries.

Views on the Standard would be most welcome. For example, do you think NZKC should have adopted the current UK standard?

Samoyed Books For Sale

These books are available for sale—offers welcome

The Samoyed (New Zealand) 2nd edition 1966 (2 copies)

By V E P Auckram & P M Wilson

Classic book on the breed by two kiwi Samoyed breeders (kennel names - Belaya Sobaka and Chienne d'Or) with chapters covering all manner of Samoyed ownership, including breed history, training, grooming, and breeding; plus pedigree details of all NZ champions from 1900 to October 1965; and an international kennel advertising section.

Both copies in very good condition. One copy has an inscription from co-author Val Auckram but has a tear on the cover. The other has a few tears on its cover and some sellotape marks on a few pages but not on text pages.

The Samoyed (The Samoyed Association—UK) 4th edition 1971

Another classic book with chapters covering history, heredity, breeding and rearing puppies, care, grooming, training, with a veterinary section, and UK and overseas kennel advertising section. The cover has been torn (see photo opposite) and the lower edges of the pages have been in contact with water at some stage as evidenced by some slight crimping with no ill-effects on the text or photos.

Both books have many photos of Samoyeds of yesteryear, many of which are in the pedigrees of today's Samoyeds.

Both are a "**must have**" in your canine library.

The Samoyed Club Inc

Judge's Critique

Before beginning I would like to thank your club once again for giving me the opportunity to judge your Diamond Anniversary Show. I had been told that New Zealand Samoyeds were excellent, and I wasn't disappointed. My task was made easier by the overall friendly and sporting spirit, which seemed to prevail among exhibitors.

The dogs were beautifully presented and the show was extremely well organised. My stewards kept everything running smoothly and certainly deserve a special thank you.

I can only say that my first overseas appointment was a pleasant and fulfilling experience. I will always treasure the beautifully embroidered towels that will remind me of my visit.

I was particularly impressed with the beautiful heads on your dogs. I know that heads don't contribute to the dogs working abilities, but they are definitely an important part of breed type. I also saw many examples of excellent feet. This is an important breed characteristic, which helped Samoyeds to survive in their native habitat. Unfortunately this characteristic is being lost in Australia.

My main concern would be construction and movement. Most exhibits showed the strong graceful fluid movement required of the breed, but in a few cases, lack of correct angulation tended to restrict the movement and shorten the stride.

In many of the classes the decisions were truly difficult, as so many of the differences between the dogs were only minor.

Thank you again.

Vivienne Zavattaro, Azavasam Kennels, Australia
Judge

BABY PUPPY DOG (1 entered)

1st BLUE AEGEAN LEVENTIS FROM SNOWSAPPHIRE (IMP UK) (Yau)

This was an absolutely delightful baby, with plenty of attitude. He trotted happily around the ring as if he owned it. A beautifully proportioned wedge shaped head, dark almond shaped eyes and small well furred ears all contributed to the typical warm friendly expression.

A beautifully balanced baby with good angulation front and rear, good depth and width of chest, and correct length of loin. Forelegs were straight and strong and feet were of the required shape. A correctly carried long profuse tail and excellent coat complete the picture. Movement was very good for

a puppy. Overall a very promising baby.

PUPPY DOG (4 entered, 1 scratched)

1st OSCARBI IM-A BARK STAR (Barzey/Clark)

This dog had excellent breed type. A typical wedge shaped head was set off by correctly set ears and almond shaped eyes. The eyes could have been a slightly darker shade. The body was well proportioned with a deep chest and strong loin and very good angulation fore and aft.

He had straight forelegs, very good feet, a long profusely coated tail and a thick coat of the correct texture. His movement was graceful and fluid.

2nd ZAMINKA FINEST HOUR (Carleton)

Another dog showing excellent type. He had a very good head with a flat skull and medium sized muzzle, dark almond eyes and nicely placed ears. He had good angulation front and rear and a good depth of chest. I would have liked a slightly shorter loin.

His feet were very good, forelegs strong and straight, and he had a lovely thick coat of the correct texture. Movement was fluid and balanced.

3rd ZAMINKA UNDER PRESSURE FOR WYTEKLOUD (McRae)

This dog also exhibited very good breed type. The head was a good wedge shape with correct proportions, almond shaped eyes and correctly set ears. The body shape was good with well angulated hindquarters. Tail carriage was a little slack at times. His coat was very good and his movement was strong and balanced.

INTERMEDIATE DOG (1 entered)

1st ZAMINKA POWER SUNRISE (Asplet)

This was my **RESERVE CC DOG**.

His breed type was extremely good, with a strong masculine head, lovely dark almond shaped eyes, small well furred ears, and the desired smiling expression. Body proportions were very good with a deep chest, strong loins and excellent angulation both fore and aft. He had a very good length of leg, and correctly shaped feet. His undercoat was soft and dense with a harsher, not overlong, outercoat standing well off from the body.

His long striding, free flowing movement was exceptionally good, and he showed excellent reach and drive.

LIMIT DOG (2 entered)

1st ZAMINKA ONE VISION (Carleton, Bello)

Another beautiful Samoyed head, showing correct pro-

Championship Show

Monday, 1 June 2009

portions, very good eyes and ears, and a smiling expression. His body proportions were good, with a deep chest, strong loins and very good angulation front and rear. His stance in front was slightly wide.

He had strong forelegs, correct feet and a very good coat. His movement was fluid and balanced.

2ND SUNSHINE KLASIC KRUZ (Shugg, Horne)

This dog was also a very good Samoyed. He had a lovely typical head with correct eyes and ears and a warm friendly expression. He appeared slightly longer in body than the winner. His angulation was good both fore and aft, and he had the required depth of chest. His forelegs were straight and he had very good Samoyed feet.

He lacked sufficient undercoat to create the desired stand off effect. Movement was balanced and free flowing.

NEW ZEALAND BRED DOG (3 entered)

1ST CH OSCARBI WILD IS THE FUTURE (Barzey, Clark)

Once again an excellent typical Samoyed head, with a broad flat skull, and medium sized muzzle. His eyes were dark brown and almond shaped and his ears were small and correctly set. He was soundly constructed, with good body proportions and good angulation fore and aft. He had excellent feet and strong straight forelegs.

The tail was long and profuse and correctly carried. He had a beautiful soft dense undercoat with the desired stand off outercoat. His movement was strong and fluid.

2ND CH SUNSHINE IN A GLASS (Shugg)

Another well proportioned wedge shaped head with a moderate length of muzzle. The eyes were dark in colour and the ears were correctly set. He showed good angulation both front and rear and had a deep chest and strong loins.

His feet were excellent. His long tail was correctly carried, and he had the typical standoff coat. Movement was strong and graceful.

3RD ANGARA LORD LUIBEK (Barr)

A beautiful wedge shaped typical masculine head, with dark eyes, well placed ears, correct length of muzzle and a defined stop. He was longer in body than the others. He showed good depth of chest, straight strong forelegs and good feet. His tail carriage could be stronger, and he lacked sufficient undercoat to enable the coat to stand off from the body.

Movement was balanced and free flowing. When against such strong competition his age told.

VETERAN DOG (3 entered)

1ST NZ CH ALDONZA KID N LACE (IMP AUST) (Carleton)

A well proportioned, wedge shaped, very typical masculine head, with dark brown oval shaped eyes and small well furred ears, showing a lovely smiling expression. He had good depth and breadth of chest, strong loins and good angulation fore and aft. The forelegs were straight, he was a little down in pastern, and he had very good feet.

His tail was profusely coated and carried well. The undercoat was soft and dense and the outer coat stood well off the body. His movement was steady, balanced and still powerful.

2ND CH ANGARA KINDA WINDY (Barr)

Head shape and proportions were excellent. The ears were small and correctly carried. His dark brown eyes could have had a slightly better shape. His hindquarters were well angulated, his forelegs straight and strong, and his feet were very good. I would have liked a little more depth and width of chest.

The long tail was carried well, and while the undercoat was sufficiently thick it lacked length at this time. His movement was very good, showing strength and grace.

3RD NZ/AUST CH SAMWAYS AINT HE AWE SOME (Gilchrist)

Another beautiful head, set off by correctly placed ears and dark almond shaped eyes, creating the desired smiling expression. He appeared slightly longer in body than the others, and his topline sloped towards the rear when on the move. The angulation was good both fore and aft. He had strong legs and very good feet.

There was insufficient undercoat to hold the outer coat away from the body. He moves with a balanced free flowing action.

OPEN DOG (3 entered, 1 scratched)

1ST CH WYTEKLOUD FLASH ZAM N KA BAM (McRae)

This was my **DOG CC & BEST OF BREED WINNER.**

Another dog with excellent breed type. He had a superbly typical head with a broad flat skull, correct stop and medium length of muzzle. Lovely dark almond eyes and small well furred ears contributed to the typical smiling expression. A very well constructed dog whose body proportions were excellent, with a deep chest, strong loins and very good

2009 Championship Show Critique continued

angulation front and rear. Forelegs were straight and strong and he had excellent feet.

His tail carriage was very strong. The undercoat was deep and very dense, and the harsher textured outercoat stood well off from the body. Movement was powerful, graceful and fluid with very good reach and drive.

2ND NZ CH KALASKA ASTRO BOY AT OSCARBI (IMP AUST) (Barzey, Clark)

Breed type is again excellent. A strong masculine head, correctly proportioned, with dark almond eyes and well furred ears, and a soft smiling expression. His angulation was very good both fore and aft. He had a deep chest and strong loins, slightly longer than the winner. Forelegs were strong and straight. His feet were very good but he toed out slightly when standing.

The long tail was carried well and his coat showed the desired dense thick undercoat and harsher textured outercoat. His movement was strong and free flowing.

BABY PUPPY BITCH (1 entered)

1ST KELLJASS PAW PRINTS IN SNOW (Kelly)

A very promising youngster with very good breed type. Her head was beautifully proportioned with dark brown almond shaped eyes and correctly set ears, a little large at present. Angulation is very good fore and aft and the chest should broaden with maturity. She had straight legs, very good feet and a lovely soft but strong puppy coat. When she chose, she moved very well.

PUPPY BITCH (2 entered)

1ST KIMCHATKA MS SCARLET O'HARA (Hawkins, Hamer)

This was my **RESERVE CC BITCH**.

A beautiful bitch with excellent breed type. She had the correct flat skull and medium sized muzzle, dark almond eyes and correctly set well furred ears. Her expression was very pleasing. Her chest was deep, her loins were strong and she had very good angulation both fore and aft. Her forelegs were straight and her feet were good.

The long tail was correctly set and her coat was excellent quality. She moved with a strong balanced action showing good reach and drive.

2ND SUNSHINE BJ'S DREAM (Shugg)

Another very good wedge shaped head with good proportions. She had dark almond eyes, correctly

set ears, and a smiling expression. Her body was slightly longer than the winner. I would have liked a little better angulation both front and rear, and a slightly deeper chest. She had straight legs and very good feet. Stance was slightly east west.

The tail was long and profuse and correctly set. The coat was very good quality but lacked sufficient undercoat at present. Movement was balanced but lacked reach and drive.

JUNIOR BITCH (3 entered, 1 scratched)

1ST OSCARBI FUTURE EXCITEMENT AT CAR RIDENE (Barzey, Clark, Matheson)

Breed type was very good. She had a lovely feminine head with a flat skull and moderate length of muzzle. Her eyes were a good shape but could have been a shade darker. Her ears were correctly set and her expression was very pleasing. She had very good body proportions and was well angulated fore and aft. Her forelegs were strong and straight, her feet were very good and her long tail was correctly set.

The coat was deep and dense with the required off standing outercoat. Movement was graceful and fluid.

2ND WHAKAPONO OF MAGADAN (Hayward)

This bitch also had a lovely well proportioned feminine head. She had dark almond shaped eyes and well placed ears, a little on the large side. Her body proportions were good, but she tends to stand close in front with feet turned out. Angulation is good both fore and aft. The long tail is correctly set and her coat is good quality. Her movement was balanced and fluid.

INTERMEDIATIE BITCH (1 entered, 1 scratched)

LIMIT BITCH (3 entered, 1 scratched)

1ST CHENSKI MILLION DOLLAR BABE (Gilchrist)

Another very good feminine head, showing the correct wedge shape and medium sized muzzle. Eyes were dark but could have been more almond in shape. Her slightly large ears were correctly set. The expression was pleasing. She had a deep chest, strong loins and good angulation fore and aft. Her forelegs were straight and her feet were very good.

The tail was long and profuse and her coat was deep, dense and stood well off the body. She moved freely with good reach and drive.

2ND ANAHERE OF MAGADAN (Hayward)

A typical feminine head having good proportions, dark almond eyes and correctly set ears. Her expression was warm and friendly. She had a nicely proportioned body with a deep chest and a strong loin. Rear angulation was good. Her forelegs were straight and her feet were good.

2009 Championship Show Critique continued

The tail was correctly carried and her coat was very good quality, standing well off the body. In profile her movement was good, but her front legs crossed when coming in.

NEW ZEALAND BRED BITCH (5 entered, 1 scratched)

1ST CH ZAMINKA MAGIC MOMENTS (Swetman)

My CC BITCH & RUNNER UP IN SHOW

A lovely bitch, with excellent breed type. Her head was particularly good with a flat skull, medium muzzle defined stop, and correct wedge shape. Almond shaped eyes of a beautiful dark brown, and small well furred correctly set ears, all combined to give the desired smiling expression. Her body proportions were excellent with a deep chest, strong loin and very good angulation both front and rear. She had strong straight forelegs, typical feet and a long profuse correctly carried tail.

The undercoat was thick and soft with a harsher textured outercoat standing well off the body. Her movement was fluid and graceful with excellent reach and drive.

2ND CH ZAMINKA STILL A KID AT HEART (Clark)

Another lovely bitch with excellent breed type. She had very good head proportions, dark almond eyes and small well placed ears. Her expression was very pleasing. She was slightly longer in body than the winner, with a deep chest, strong loins and very good angulation both fore and aft. Her forelegs were straight and her feet were very good. She was a little down in pastern.

The tail was long and correctly carried and her coat was excellent. She also moved very well with grace and power.

3RD CH WYTEKLOUD AMBERS BURN FOR EVA (McRae)

A third bitch showing excellent type. A lovely well proportioned feminine head with dark almond eyes and well furred correctly set ears. She had a deep chest, strong loins and good rear angulation. Her feet were very good and her forelegs were straight.

The tail was long and carried well and her coat showed the desired dense soft undercoat holding the harsher outercoat away from the body. Movement was fluid and graceful.

OPEN BITCH (2 entered)

1ST NZ CH KALASKA WILD EXCITEMENT AT OSCARBI (IMP AUST) (Barzey, Clark)

This was another very typey bitch with a very good head. She had dark almond eyes, small well placed

ears, a moderate length of muzzle and a good wedge shape. All creating the typical smiling Samoyed expression. Her angulation was very good both fore and aft, her chest was deep and her loins were strong. She had straight forelegs, very good feet and a long profuse tail.

Her excellent quality coat completed the picture. Movement was free flowing and graceful with very good reach and drive.

2ND CH SUNSHINE PAINT ME GOLD (Shugg)

Another very good head showing good proportions, dark almond eyes and well placed ears, creating a pleasing expression. Her body was slightly longer than the first. She had a deep chest and good hindquarter angulation. Her forelegs were straight and her feet were very good.

The tail was long and correctly carried. Her coat showed the desired qualities but was slightly lacking in undercoat at present. Movement is good in profile but she toes in slightly when coming in.

BEST IN SHOW AND RUNNER UP

This was probably the hardest decision of the day. Dog and bitch both showed excellent breed type. They both had superb heads, and they both were very well constructed, resulting in powerful graceful movement with excellent reach and drive. Today my winner was the dog, but it was a very close decision.

Movement Over 12 months.

Junior Handler – Entries taken on the day.

Parade of Veterans will be held, send resume to show secretary.

Trophies For Financial Members Only

Prizes for Open Competition, Stakes Prizes Cash – 30/20/10%

Catalogues \$5.00

Light refreshments will be provided

Wonders of Winter (W.O.W.), Paw'tastic Dog Sledding in

I have always been a dog lover but never thought while I was growing up in Michigan that I would be training my own dog sled team. I have loved the outdoors my entire life, and growing up on a small lake in central Michigan I had a great time. I prefer being outside more than inside, even in conditions that many consider unpleasant. When we moved to North Dakota so my husband, Bob, could take a position in the biology department at the University of North Dakota, we bought an older farmstead so we could continue the rural life we love.

After the loss of a 3 year old Golden Retriever that Bob used to pull him on cross country skis, we started to look at northern breeds. Bob decided he wanted an Alaskan Malamute and I wanted a Samoyed. We bought one of each and that was 11 ½ years ago. Bob was skijoring (the dog pulling him on the cross country skis) and I was snowshoeing and of course could not keep up. I was hooked on Sams, so bought another one and well it snowballed from there!

At present we have 21 dogs, with 16 still working in harness and 5 are retired. From reading books, magazines and checking out internet information on dog sledding I knew I had to try this with the dogs I had at the time: one Golden, one Malamute and 2 Samoyeds.

Prairie Isle Sled Dogs on Gun Flint Lake, MN

Well I did not have a "lead dog" and boy it was a struggle to get anywhere! But as I acquired more dogs and became friends with other mushers I started to learn how to do some things and how NOT to do things. Plus a puppy I bought in 2000 turned out to be a natural leader and things started to come together.

Dog sledding takes a lot of work to get a group of dogs to work together as a team. One learns patience, and how to cope with frustrations that pop up when you least expect them. But it is all worth it when one sees the breath of your dogs in the crisp air and all you hear is the runners across the snow. The quietness that surrounds you and the feeling of being part of nature is thrilling. Being on the trail with my dogs is where I love to be.

Opposite:

Prairie Isle Sled Dogs on Gun Flint Lake, MN

After 10 years of dog sledding in North Dakota and in southern Manitoba, Canada, I had the opportunity to spend 4 ½ months (winter of 2008) in the Boundary Waters Canoe and Wilderness Area in northern Minnesota. So I loaded up

North Dakota, USA by Helen L Corlew

16 of my dogs and headed out for a new adventure and a wonderful learning experience. During this time I provided dog sledding experiences to the public. My dogs and I were tested daily on our ability to transport people on trails along the Gunflint Trail area plus on the surrounding lakes. I found strength, mentally and physically, in myself but also in my team that I did not know was there. I also realized how much my dogs trust me and I them. We became a very close knit team. What an experience.

of the facility about my idea of offering educational experiences to the public on dog sledding they were excited to have me work out of their facility. On their 650+ acres, trails were created for winter use plus once the lake, Red Willow, froze safely I knew I could take the dogs on to the lake too. The nice thing about the trails at RWBC is they are multi-use trails for hiking, horses, birding and in the winter cross country skiing and now the dog team. Also a BIG plus is it is private land and snowmobilers are not allowed

on the trails. A snowmobile was used to pack and groom the trails so the prairie wind did not just blow all the snow away. Safety of the team and any one with me on the sled is high priority so knowing we would not be startled by snowmachines is comforting.

I contacted ND tourism and they were excited about my project. Prairie Isle Dog Trekking's Wonders of Winter (W.O.W) Paw'tastic became a Learning Based Vacation in ND!

This past winter I worked with church youth groups, 4-H, and private individuals and groups at RWBC plus I was able to add on another very scenic location, Sheyenne River Valley, for people wishing for one hour up to 4 hours on the trail with the team.

So what does one do at a W.O.W day? You learn about dog safety, how to approach and be near sled dogs—in particular my dogs which are Alaskan Malamutes, Samoyeds and one Hedlund Husky. You learn how to stay warm when it is minus 20 and the wind is howling or if it is 20 degrees and calm, plus you learn about the history of dog sledding

Left:
Moonrise over the sled team, Sheyenne River Valley

Below: Sled

When I returned to ND in the spring of 2008 I decided why not do something similar here in ND. Bob liked the idea since it meant I would be working from home and my retired sled dogs liked the idea that I would be at home.

In the off season I had been doing Tellington TTouch® training with people and their pets that have behavioral issues so I saw that as a way also to promote my new dog sledding pursuit.—possibly new clients! Since I live in a prairie state and my kennel name is Prairie Isle, I decided to name my new adventure Prairie Isle Dog Trekking™ (PIDT)

Red Willow Bible Camp (RWBC) is near Binford, ND and about an hour drive south of my place in Petersburg. After talking with the directors

Team climbing out of Sheyenne River Valley at sunset

(mainly freight dogs) and that it is not just racing as many people seem to think. Gee, haw, gangline, neckline, tighten up, stanchion, snow hook – you go what? You learn what commands are used, all about the equipment, safety on the trail plus how to handle a sled. You can help harness dogs, hook them up to the sled plus you get a chance to drive the team with the musher right there with you.

I tandem sled so the guest can experience being on the runners and drive the team with the safety of the musher present.

When you are waiting your turn, if this is a group of people, you can cross country ski, snowshoe, geocache, sled down the hill, go ice fishing or sit by the fireplace with a hot cup of cocoa. Equipment is provided for all the above (except ice fishing) or bring your own. Did I mention food? Well RWBC will provide meals for my guests too. And it is all home cooked meals that are hot and fresh.

If someone wants to explore the Sheyenne River Valley for an hour or longer there are a couple options for that. One could stay at Volden Farm

for an hour or longer there are a couple options for that. One could stay at Volden Farm Bed and Breakfast which is near Luverne, ND but actually is right next to the trail I take to get down to the Sheyenne River. Or one could stay at RWBC and drive the hour to Prairie Bilt Sleds, the manufacturer of the sleds I use and my starting point for the Sheyenne River Valley experience. At Prairie Bilt you can see a kennel of 20+ Alaskan huskies that Jim and Mary Ann Miller keep for their own enjoyment but also so they can test the dog sleds they build. Safety (dog and trail) will be covered, staying warm, equipment, commands, how to handle the sled and dogs, etc. are all covered before we head out for an experience of a life time.

I am putting together a W.O.W. Woman Challenge to encourage women to get out and try something new in the winter months. My thought is to include winter survival, orienteering, dog sledding, cross country skiing and snowshoeing for women of all ages. An experience a mother and daughter could share!

Besides being fun, dog sledding teaches you some life lessons.

- Think positive: When you think positive you can accomplish anything. The dogs feed upon your feelings just as you do, so have a positive outlook.
- Keep going: You can do it, even when it gets difficult. A tangle may occur but you can take care of it. In life “tangles” happen and we are able to untangle the messes of life by just doing.
- Relax and enjoy the moment: Life is really too short, do not get overly stressed by things and take the time to enjoy and you will see how wonderful things really are.
- Go with the flow—it will be okay: If one steps back and realizes that all will be fine in their life if they just let go of “bad” things then they can live life again.
- Trust—there has to be mutual trust between you and your team. Trust yourself that you can handle whatever is thrown at you.

Two children having a fun ride with 4 Prairie Isle sled dogs

- **Challenge:** We are challenged everyday and we make our life great by meeting our challenges head on. When one is dog sledding you are faced with challenges all the time such as; can we climb that hill, how far can I push the team, can I upright the sled, etc. Face the challenges, trust yourself and be positive.
- **Hang on, never let go** This is a BIG one in dog sledding. The first lesson you learn in dog sledding is to NEVER let go of the sled. No matter what happens you must not be separated from the sled/team. This is for the safety of you and the team. Same is true in life. Never let go, hang on even through the bumps and curves life throws at you. You can meet the challenge and have a wonderful life.

My dogs, all 21 of them, test me daily but I love my life with my sled dogs. And I look forward to when the temperatures start to drop in late summer evenings, so the team and I can be on the trail again getting ready for another winter season.

Come join the Prairie Isle sled dogs for a winter experience on the trail.

Looking back ~ “Thurber,” Wellington’s dog about town

Thurber. Wellington’s dog about town, was released late yesterday afternoon from his prison for more than 24 hours — the city pound.

The charges against him — being in a prohibited area without a leash, riding in Wadestown trolley-buses and entering city shops — are not to be pressed.

But the mayor, Sir Robert Macalister, said: “If he is to come into the city, he must comply with regulations that apply to all other dogs”.

He added, however: “No doubt Thurber will still be seen around town and will continue to be welcomed by the good friends he has made.

His owner, Miss Jane Digby, said “I’ve been given a lot of instructions about what Thurber can do and cannot do, and I’ll do my best, but it’s hard to keep a dog in check all the time, especially when I’m at work, and he doesn’t mean any harm”.

Thurber, a bull terrier with one blue eye and one brown eye, whose habit it has been to get into and out of trolley-buses on his way into the city from Wadestown, was seized in Lambton Quay while making his daily calls on a select circle of friends.

Shopkeepers whom Thurber visited on his daily beat were indignant when interviewed yesterday that he had been impounded.

“Thurber has better manners than two-thirds of the men in Wellington,” said a shop proprietress.

Miss Digby collected her pet at 4.30 pm yesterday after permission for his release had been obtained from the city solicitor, Mr M J Earle.

Thurber, after the briefest of acknowledgements to a small party waiting for him, showed a strong desire to put the greatest possible distance between himself and the poundkeeper.

The photo accompanying the story shows Thurber (a typical Bull Terrier) on his release. He is on a lead held by mistress who was smartly attired in a suit, hat, and high heels.

The Dominion, 1956

New CYF worker: small, furry and here to stay

She is a four year-old Border Collie cross dog, her name is Tess, and she is now a permanent part of the staff at Child, Youth and Family’s care and protection residence in Wellington.

Tess has moved in to the residence full-time to support therapeutic interventions with the young people who live in the residence. She is thought to be the first pet to live-in full time like this in New Zealand.

The initiative is a first for the Wellington SPCA who are monitoring the placement closely to ensure that Tess is settling in well. “We spent a long time talking with Child, Youth and Family before we placed Tess in the residence. We took the time to find the right dog with the right temperament. When we found Tess we knew she would fit in great” says Nick Taylor, Wellington SPCA Animal Operations Manager.

Having a pet live-in full time, also known as ‘pet therapy’, has a number of benefits for the young people including helping them to build empathy and learn nurturing skills. Pet therapy has been used in settings such as hospitals and prisons for many years where the pets will visit for short periods. Tess is thought to be the first pet to live full-time.

“We’ve had to make a few changes around the residence to give Tess the space she needs,

including private space for when she needs time out” says Ross Barber, Residence Manager for Child, Youth and Family.

The SPCA and Child, Youth and Family signed an Interagency Protocol between the two organisations in September 2008. The protocol sets down a formal working relationship in which the agencies will inform each other if they suspect animal or child abuse is occurring.

As a result of this closer working relationship, The SPCA has begun pet therapy programmes in both the Wellington and South Island Child, Youth and Family residences. The programmes bring animals into the residences to spend time with the children and young people and help them to develop pro-social interaction and to build nurturing skills. It then seemed a logical extension of the concept to include a pet becoming a full-time feature of the residence.

From “Press Release” 5 June 2009

Reminder from the Points Steward

Not all the results sent to the Points Steward by email are being posted on ANZSAMS.

Anyone sending electronic results to the Points Steward must firstly make sure they go up on ANZSAMS as well.

You know you're owned by Sammies when...

- Your clothing of choice is TWEED (but you looked so good in black!)
- The damage your Sam has done to your house finally exceeds his purchase price (and he's just discovered where you keep the shoes, gloves and purses!)
- You eat at a fancy restaurant and comment on your empty plates, "Gee, these would make good dog lick-ins'..."
- You choose your mate by how the dogs take to him, and how well he can build a whelping box...
- You buy a trash compactor to keep temptation sealed out of their way...
- Your windshield has more noseprints than the CKC and your used-car dealer tells you "I've seen haywagons in cleaner condition..."
- You tell the home-alarm salesman, "Sorry, my system's better, it's foolproof and it never goes off accidentally..."
- Your central vacuuming system can be repaired only by Roto-Rooter...
- Your version of New Age Cuisine is not "blackened" anything, but well-seasoned with ambient white dog hair...

Elizabeth Crosby Metz, SAMBUSHED, USA

How Dogs Are Better Than Men

- Dogs do not have problems expressing affection in public.
- Dogs miss you when you're gone.
- You never wonder whether your dog is good enough for you.
- Dogs feel guilt when they've done something wrong.
- Dogs don't criticize your friends.
- Dogs admit when they're jealous.
- Dogs are very direct about wanting to go out.
- Dogs do not play games with you -- except fetch (and they never laugh at how you throw).
- Dogs are happy with any video you choose to rent, because they know the most important thing is that you're together.
- Dogs don't feel threatened by your intelligence.
- No dog ever voted to confirm Clarence Thomas.
- You can train a dog.
- Dogs are easy to buy for.
- Dogs are good with kids.
- Dogs are already in touch with their inner puppies.
- You are never suspicious of your dog's dreams.
- Gorgeous dogs don't know they're gorgeous.
- The worst social disease you can get from dogs is fleas. (OK. The *really* worst disease you can get from them is rabies, but there's a vaccine for it, and you get to kill the one that gives it to you.)
- Dogs understand what no means.
- Dogs don't need therapy to undo their bad socialization.
- Dogs don't make a practice of killing their own species.
- Dogs understand if some of their friends cannot come inside.
- Dogs do not read at the table.
- Dogs think you are a culinary genius.
- You can house train a dog.
- You can force a dog to take a bath.
- Dogs don't correct your stories.
- Middle-aged dogs don't feel the need to abandon you for a younger owner.
- Dogs aren't threatened by a woman with short hair.

- Dogs don't step on the imaginary brake.
- Dogs admit it when they're lost.
- Dogs don't weigh down your purse with their stuff.
- Dogs look at your eyes.
- Dogs like your size.
- Dogs do not care whether you shave your legs.
- Dogs take care of their own needs.
- Dogs are color blind.
- Dogs aren't threatened if you earn more than they do.
- Dogs mean it when they kiss you.
- Dogs are nice to your relatives.
- Dogs obsess about you as much as you obsess about them.
